

Safety, Maintainability, and Operational Efficiency. Integrate Flight Operations, Monitoring and Maintenance Activity

A complete system that helps you manage your fleet.

Integration of SkyConnect Tracker III with On Board Health and Usage Monitoring System (HUMS)

Key Features

- Reliable, Globally-available Iridium satellite mission management system
- Concurrent Talk, text or tracking in a single box
- Encrypted GPS position reports for fleet tracking
- HUMS and vibration analysis enables maintenance based on condition
- Provides real time vibration exceedance alerts to ground crews
- Post flight web service support for flight data monitoring, fleet health trending and diagnostics

Benefits

- Optimize your mission - Real time messaging, weather, integrated flight planning, routing efficiency
- Prepare for repairs before you land - Reduced downtime and faster return to service
- Single billing for all services simplifies support
- Increased safety - proactive identification of faults or failures to prevent accidents
- Reduce maintenance cost via HUMS – fewer spares and test flights, faster diagnosis
